DETAILED ACTION

Claim Objections

1. Claims 13-25 are objected to because of the following informalities:

The numbering of claims is not in accordance with 37 CFR 1.126 which requires the original numbering of the claims to be preserved throughout the prosecution. When claims are canceled, the remaining claims must not be renumbered. When new claims are presented, they must be numbered consecutively beginning with the number next following the highest numbered claims previously presented (whether entered or not).

2. Misnumbered claims 14-24 needs to be renumbered 26-36, also claim dependency need to be change. Appropriate correction is required.

Claim Rejections - 35 USC § 103

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

1. Claims 25 is rejected under 35 U.S.C. 103(a) as being unpatentable over Amano et al. (U.S. Patent # 6,426,608) in combination with Carlson et al. (U.S. Patent # 6,617,820).

Art Unit: 2838

Amano et al. disclose the claimed subject matters such as a power supply for motor vehicle (figure 8 and (column 5, line 10-15), a first voltage level to the first consumer, a second voltage level to second energy consumer (figure 1, item 14V and 42V system), the second voltage level is higher than first voltage level (figure 1, item 42V), a second energy storage (figure 1, item 6). In regards to further limitation whereby the second voltage level will not fall below the first voltage level.

The statement following "whereby" is not given patentable weight, since the courts held that the functional "whereby" statement does not define any structure and accordingly cannot serve to distinguish. In re Mason, 114 USPQ 127, 44 CCPA 937 (1957).

As best understood, in regards to claims 14-24 is also reads on cited art Amano et al. (U.S. Patent # 6,426,608) in combination with Hanyuda et al. (U.S. Patent # 4,727,448) discloses claimed subject matters (Abstract, line 1-25).
